# MYTHBOUND Playthrough Guide

A complete walkthrough of MYTHBOUND v1.0, from choosing your Tamer to the eighth seal and the ending credits. Every screenshot was taken from the real game. The AI text (villager lines, custom attacks, lore and Mythic Forms) was written live by a local Ollama model, so your game will word these differently.

# 1. Before you start

### Two ways to play

- **Offline:** open `mythbound.html` in a browser. Everything works. Custom attacks, villager lines, lore and Mythic Forms use the game's built-in offline text.
- **With AI:** run `node server.js` and open http://localhost:8787. For free local AI, see the main README's "Free local AI (Ollama)" section. The bottom-right of the title screen shows `AI: server mode` or `AI: offline mode`.

### Controls

| Action | Keyboard | Touch |
|---|---|---|
| Move | Arrow keys / WASD | D-pad |
| Confirm, talk | Z, Enter, Space | A |
| Back, cancel | X, Backspace | B |
| Menu | Esc, C or M | MENU |
| Run | Hold Shift (or X) while walking | hold B |
| Mute | N | music-note button |

During long text, hold Z to speed it up. You can also raise **Text speed** in Options.

## 2. Starting a new game

Press Z on the title screen and choose **NEW GAME**.

### Choosing your Tamer

There are 10 Tamers. The story is the same for all of them; only the sprite, backstory and **perk** change.

| Tamer | From | Perk | Good for |
|---|---|---|---|
| Ira | Indrapuri | +10% taming chance | Filling the Bestiary |
| Tarun | Indrapuri | +10% experience | Less grinding |
| Saanvi | Indrapuri | 15% shop discount | Buying lots of orbs and potions |
| Eleni | Olympos | Healing items heal 20% more; revives restore 60% | Tough god fights |
| Leif | Asgard | Starts with 5 extra Bana Orbs and 2 Agneyastra Orbs | A fast early team |
| Amunet | Heliopolis | 4 custom attacks per battle instead of 3 | Players who love custom attacks |
| Haruto | Takama | Critical hits happen twice as often | Fast, aggressive fights |
| Orla | Tir na nOg | +25% coins from battles | Money for orbs and items |
| Iltani | Babylon | Uncommon and rare creatures appear more often | Finding rare creatures |
| Mirko | Kitezh | Companions get +4 max EN and regain EN faster | More custom attacks and big moves |

**Recommendation:** for a first run, pick **Tarun** (less grinding) or **Ira** (easier taming). This guide plays as Ira.

### The story begins

A short intro tells you about the eight mythic cities. Then Elder Bhaskar asks you to choose your first companion.

## Choosing a starter

| Starter | Type | Evolves into (Lv 16) | Notes |
|---|---|---|---|
| Yalicub | Ember | Yalidhar | Strong attacker. Weak to Tide and Stone. |
| **Makarin** | **Tide** | **Makaraja** | High Defense. Strong against Agni, the first lieutenant (Ember). |
| Vanarling | Grove | Vanaveer | Hits Tide and Stone hard. Weak to Sky and Ember. |

**Recommendation: Makarin**. Its Tide moves are super effective against Agni's fire team, and Makaraja stays useful against the many Ember and Stone creatures later on. This guide uses Makarin.

You wake up in the Elder's House. Talk to Elder Bhaskar (face him and press Z): he gives you **5 Bana Orbs and 3 Soma Drops** and points you south to the Monsoon Trail.

## 3. How battles work

Walking through tall grass starts **wild battles**. Trainers start **trainer battles** when they spot you or when you talk to them.

**The battle menu**

| Option | What it does |
|---|---|
| FIGHT | Use one of your companion's moves (up to 4). Each move has PP (uses). |
| CUSTOM | Type your own attack idea. The AI (or the offline interpreter) turns it into a move. |
| BAG | Use an item. |
| TAME | Throw an orb at a wild creature (not in trainer battles). |
| SWITCH | Swap to another companion. This uses your turn. |
| RUN | Escape a wild battle (not trainer battles). |

**Bars:** HP (health), **EN** (energy, spent by custom attacks and some strong moves; it refills slowly) and XP.

## Types

There are 8 types plus Neutral. Super-effective hits deal 2x damage, resisted hits 0.5x. A move matching its user's type gets a 1.5x bonus (STAB).

| Attacking type | Strong against (2x) | Weak against (0.5x) |
|---|---|---|
| Sky | Grove | Stone, Storm |
| Tide | Ember, Stone | Tide, Grove |
| Ember | Grove, Shade | Tide, Ember, Stone |
| Grove | Tide, Stone | Sky, Ember, Grove |
| Stone | Sky, Ember, Storm | Tide, Grove |
| Shade | Light | Stone, Shade |
| Light | Shade | Light, Storm |
| Storm | Sky, Tide | Grove, Storm (**no effect on Stone**) |

**What beats what** (handy for boss fights):

| To beat... | Use |
|---|---|
| Sky | Stone, Storm |
| Tide | Storm, Grove |
| Ember | Tide, Stone |
| Grove | Sky, Ember |
| Stone | Tide, Grove |
| Shade | Ember, Light |
| Light | Shade |
| Storm | Stone |

## Custom attacks

Choose **CUSTOM** and type any idea (up to 120 characters), for example "*Summon a monsoon wave that crashes down and shields me*". A text box pops up over the game for typing. Press Enter to send it.

A **preview card** shows what you would get: name, type, effects with star ratings, accuracy, EN cost, cooldown and how many custom attacks you have left. Choose **Confirm** to use it or **Cancel** to keep your turn (no use is spent).

Rules to know:

- **3 per battle** (4 for Amunet), with a cooldown between uses, and each one costs EN.
- The game, not the AI, sets every number. A **power budget** grows with your companion's level; at low levels ratings are scaled down (the red note in the preview).
- No instant wins: a custom hit can never deal more than half of the target's max HP. Ideas like "instantly win" get low ratings.
- The move's type must be one of your creature's types or Neutral.
- Good uses: shields, stat drops on a boss, burn/poison on a bulky foe, or sleep/bind before taming.

# 4. Taming creatures

Weaken a wild creature, then choose **TAME** and pick an orb. The orb shakes up to three times. If it holds, the creature joins you.

**Improve your odds:**

- Lower its HP (red HP gives the best chance).
- Give it a status: **sleep doubles the chance**; bind, stun, burn or poison give 1.5x.
- Common creatures are easier than rare ones.
- Use a better orb.

| Orb | Price | Notes |
|---|---|---|
| Bana Orb | 100 | Basic orb. |
| Agneyastra Orb | 400 | Better than Bana. |
| Varunastra Orb | 500 | Very strong against Ember creatures. |
| Vayavyastra Orb | 500 | Very strong against Sky creatures. |
| Nagastra Orb | 500 | Very strong on sleeping or bound targets. |
| Gandiva Orb | 1200 | Very high rate. Sold after you beat Agni. |
| Brahmastra Orb | not sold | Never fails. Only one exists (Indra gives it to you). Save it for a rare creature. |

## Mythic Forms

Every tamed creature awakens a **Mythic Form**: a title (like "the Hill-Songstress") and a small stat tilt (one stat up, another down). With AI on, the title is written by the AI.

Your party holds 6. Extra creatures go to the **Sanctum Stone** in any healing shrine, where you can swap them in and out.

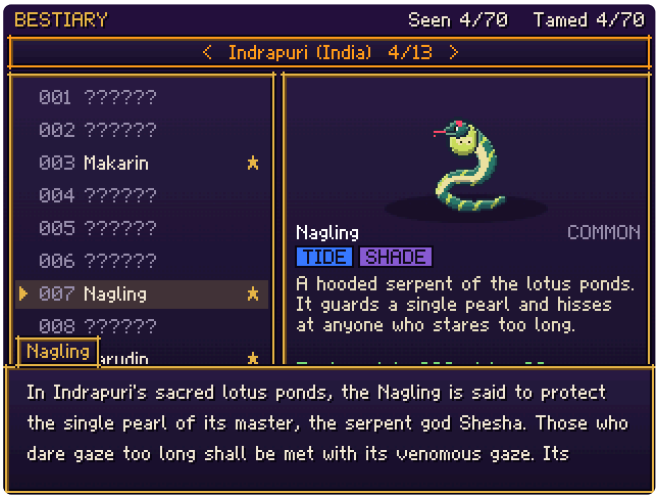

# 5. Menus, shops and shrines

Press **Esc / C / M** to open the menu. It shows your coins, seals, tamed count, play time and the AI status.

- **PARTY:** view companions, reorder them (MOVE UP), and open **SUMMARY** for stats, moves and lore.
- **BESTIARY:** all 70 creatures grouped by city. Press Z on a tamed creature for **expanded lore** (written by the AI when it's on).
- **TRAVEL:** the world map (appears after your first seal; use it outdoors).
- **BAG**, **SAVE**, **OPTIONS** (text speed, music and sound volume, mute, Bestiary preview).

**Shops** sell orbs and items. **Shrines** heal your whole party for free and hold the Sanctum Stone. If every companion faints, you wake up at the last shrine you used.

| Item | Price | Effect |
|---|---|---|
| Soma Drop | 200 | Restores 30 HP. |
| Tulsi Leaf | 150 | Cures one status (burn, poison or sleep first). |
| Ganga Jal | 600 | Cures every status of every companion. Battle only. |
| Kavach Charm | 350 | Sharply raises the active companion's Defense. Battle only. |
| Akshaya Patra Meal | 400 | Restores all PP and EN. |
| Sanjivani Herb | 1000 | Revives a fainted companion with half HP. |
| Amrita Vial | 1500 | Full HP and cures status. |

**Remember to SAVE** from the menu. The title screen shows your save's name, seals, tamed count and time.

# 6. Chapter 1: Indrapuri (India)

**Indrapuri** is your home city:

- Vaijayanta Palace is in the north.
- The Fire Hall of Agni is on the west side of the plaza.
- The Bazaar (shop) and the lotus pond are in the middle, and the Shrine of Dhanvantari is nearby.
- The south gate leads to the **Monsoon Trail**.

Talk to the villagers. Some of them (like Chotu) speak with AI-written lines.

**Order of the trial:** Pilgrim Rohan, then Agni, then Vayu and Varuna (either order), then Indra.

## The Monsoon Trail

- **First grass (Lv 3-7):** Nagling, Kinnarel, Gandharin, Vetalix, Garudin.
- **Sacred Grove (blue-green grass further south, Lv 10-16):** the same creatures plus wild Yalicub, Makarin and Vanarling.
- **Pickups:** 2 Soma Drops, 1 Agneyastra Orb, 2 Nagastra Orbs, 1 Akshaya Patra Meal (look for the glowing items).

**Who to tame first:**

- **Garudin** (Sky/Light) for Sky moves against Grove.
- **Nagling** (Tide/Shade), which evolves into Nagaraja.
- **Vanarling** (Grove) from the Sacred Grove, for Grove moves.

Aim for four or five companions before Agni.

## Pilgrim Rohan (trainer)

Rohan waits by the river and stops you when he sees you. Team: Nagling 7, Kinnarel 7, Vetalix 8, Gandharin 8. **Suggested level: 9-10.**

## Agni, Lieutenant of Indra (Fire Hall)

The Fire Hall's acolytes let you in once you have beaten Rohan.

- **Team:** Yalicub 11, Garudin 11, Vetalix 12, Yalidhar 14 (mostly **Ember**).
- **Bring:** Tide (Makarin) and Stone.
- **Suggested level:** 14-15.
- **Reward:** the Bazaar starts selling the Gandiva Orb.

## Vayu and Varuna (inside Vaijayanta Palace)

The palace guards let you in after Agni.

| Lieutenant | Team | Main types | Bring |
|---|---|---|---|
| Vayu | Kinnarel 14, Garudin 15, Gandharin 15, Kinnarel 16 | Sky, Grove, Light | Stone, Storm |
| Varuna | Makarin 14, Nagling 15, Makaraja 16, Nagaraja 16 | Tide, Shade | Grove, Storm |

**Suggested level: 17-18.** Your starter evolves at Lv 16.

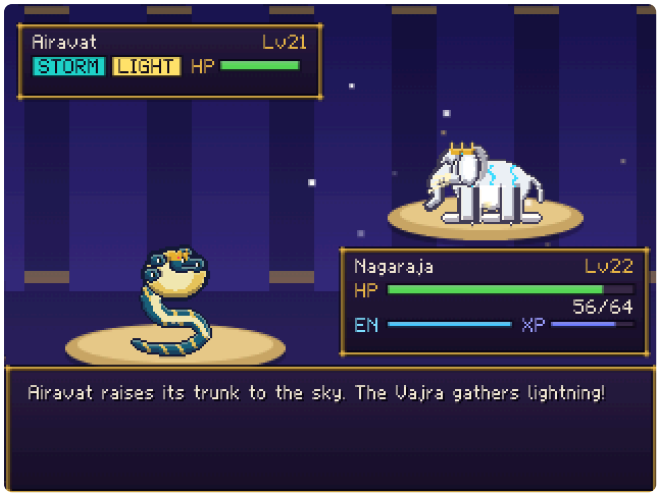

## Indra's trial (god)

After Vayu and Varuna, approach the throne.

- **Team:** Garudin 18, Gandharin 18, Nagaraja 19, Makaraja 19, and **Airavat 21** (Storm/Light), his sacred elephant.
- **Signature move:** Airavat's *Vajra Thunderbolt*.
- **Bring:** Stone against Airavat and Garudin; Grove or Storm against the Tide creatures.
- **Suggested level:** 21-22, plus a few Soma Drops.

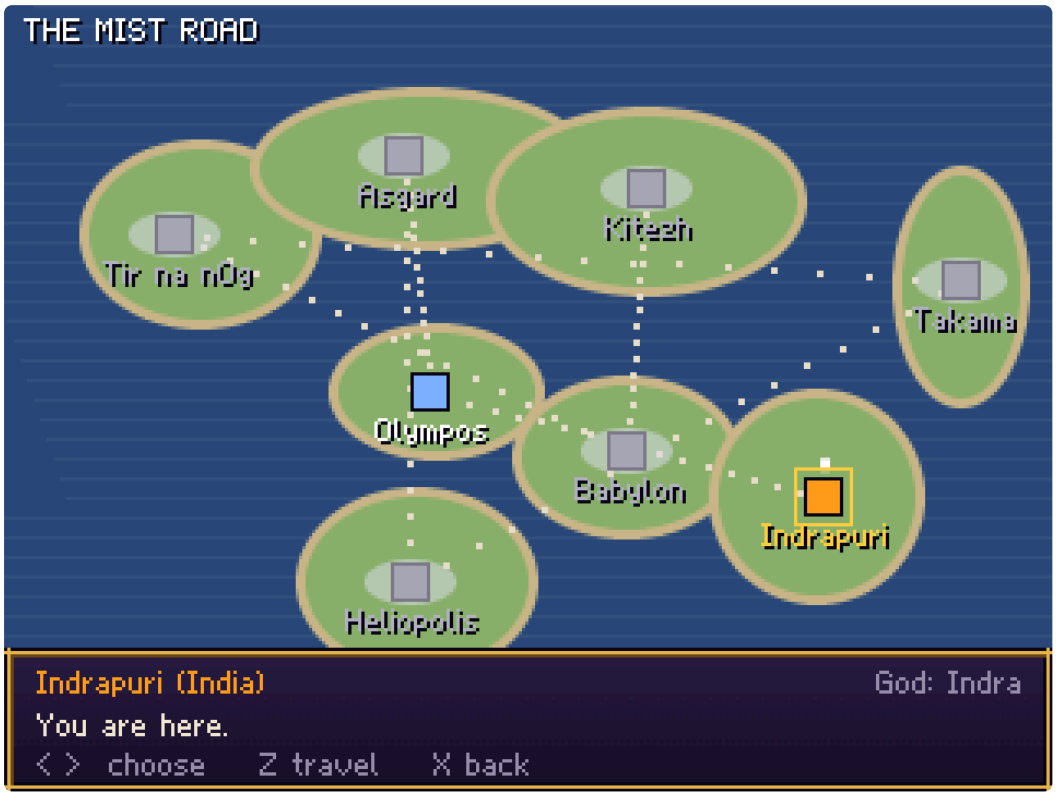

**Rewards:**

- The **Vajra Seal**, which opens the Mist Road.
- The **Brahmastra Orb**, the only orb that never fails.

## 7. The Mist Road

Open the world map with **Menu > TRAVEL** (outdoors) or by walking through a city's south gate. In Indrapuri, the sealed rocks at the end of the Monsoon Trail lead there. Each god you beat clears the mist to the next city, and you can return to any unlocked city at any time.

**City order:** Indrapuri > Olympos > Asgard > Heliopolis > Takama > Tir na nOg > Babylon > Kitezh.

**Every new city has the same layout:**

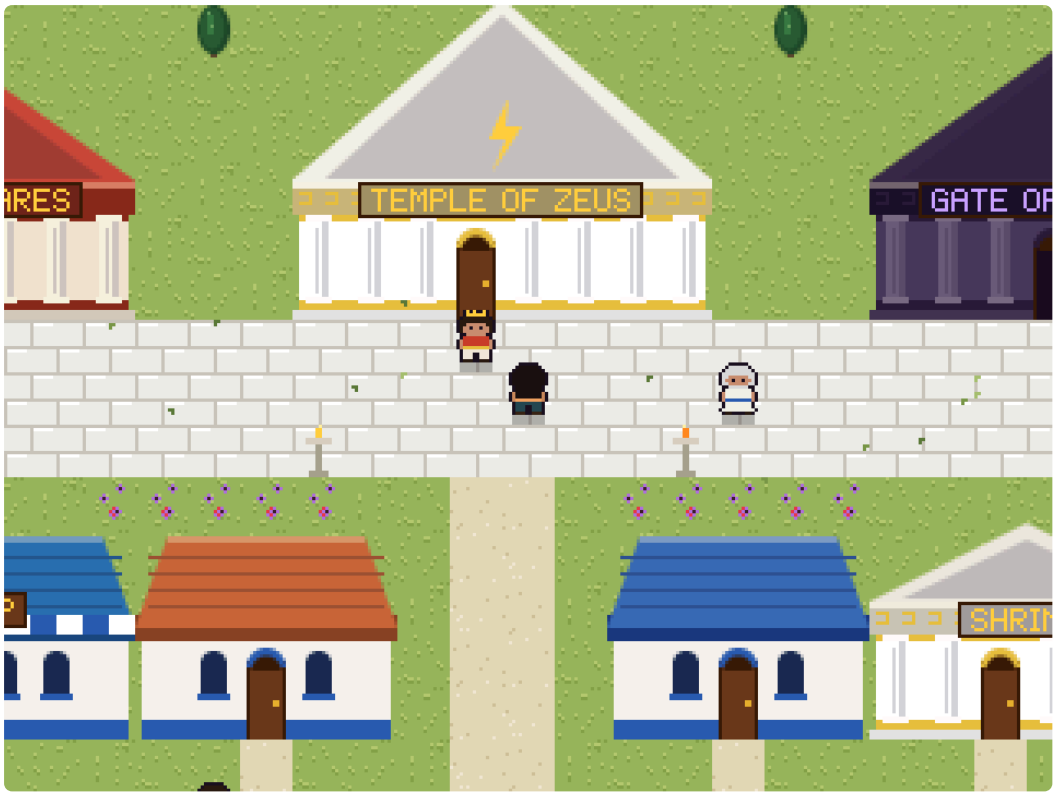

| Where | What |
|---|---|
| North, centre | The god's temple (the final trial) |
| North-west and north-east | Two lieutenant halls |
| South-east pier or bridge | The third lieutenant |
| West / east | Shop and healing shrine |
| South | Two trainers near the grass; the south gate opens the world map |

**Order in each city:**

1. Beat both trainers.
2. Beat the three lieutenants (any order).
3. Face the god.

Each city's wild creatures appear in its two grass zones. Taming a few local creatures gives you fresh types for that city's bosses.

## 8. Chapter 2: Olympos (Greece)

The suggested levels come from simulated runs. A careful player with good type matchups can win a few levels lower.

## General tips

- **Heal before every lieutenant and god.** Shrines are free.
- **Use the bench.** Companions who don't fight still earn a third of the XP, so a full party of 6 levels up together.
- **Rotate your lead creature** in wild battles to spread XP.
- **Tame locally.** Each city's grass has creatures whose types match up well against the next bosses.
- **Custom attacks are best for support:** shields, Defense or Attack drops on a boss, sleep before taming.
- **Save often**, especially before a god.
